The Honorable Senator Sullivan  
702 Hart Senate Office Building  
Washington, DC 20510

The Honorable Congressman Young  
2314 Rayburn House Office Building  
Washington, DC 20515

Dear Senator Murkowski, Senator Sullivan, and Congressman Young,

I am writing to ask for your support ensuring Alaskans continue to have access to affordable broadband telehealth services in rural and Bush communities. The Rural Health Care Universal Service Support budget has remained static for 20 years and must be increased. The current \$400 million budget remains at the initial level set in 1997, despite inflation, advances in technology and increased demand for services. The FCC expects that demand may exceed the cap for the first time in funding year 2016. An equivalent budget today, adjusted for inflation, would be about \$600 million.

Rural Health Care Universal Service Support is essential to enable providers to deliver affordable broadband telehealth services in Alaska's rural and Bush communities. Alaska received more than \$82 million in rural health care support for 2015, a substantial increase from 2014.

If rural Alaskans are to continue to receive the affordable broadband telehealth services they need, the FCC must increase the rural health care budget and index it for inflation, as it recently did with E-rate. The FCC has updated the E-rate budget from \$2.25 billion in 1997 to \$3.94 billion for 2016, and indexed it for inflation, reflecting increases in demand.

Rural health care support enables telehealth services to be provided that dramatically improve access to care, accelerate diagnosis and treatment, avoid unnecessary medivacs, and expand local treatment options.

In order for our organization to recruit and retain a dynamic primary healthcare team working within a rural setting to reduce health disparities amongst those we serve within the Chugach Region, service connectivity to provide Telehealth services is a necessity.

Telehealth services serves as an extended healthcare support system for our community health aides, primary care providers, and patients and family members in need of emergent and specialty care.

Telehealth has enabled us to provide a higher level of support and care that is quick, convenient, and desperately needed. With our Telehealth service connectivity and equipment, we have been able to provide emergent and specialty care services such as cardiology, nephrology, dermatology, and oncology service support amongst other specialty care for our people.

Undoubtedly, without service support and telehealth connectivity our healthcare teams and communities would suffer loss of life and equality.

We ask that you urge the FCC to increase the rural health care universal service support budget, index it for inflation, and provide for any unused funds to be carried forward to future funding years. This will ensure Alaska's rural and Bush communities continue to have access to affordable broadband telehealth services, critical for improving access to care.

Thank you for your support.
